ALUROLL **KIT MODELS**

FBSProfilati srl, fondata nel 1999 dalla seconda generazione imprenditoriale della nostra famiglia, è un'azienda dinamica che trae la sua essenza dal concept del "MADE IN ITALY" tramandato attraverso l'esperienza delle sue figure storiche che dal 1964 si dedicano con entusiasmo alla progettazione e produzione di profili decorativi in alluminio e serrandine. Nella nostra sede di Settimo Milanese, che si sviluppa su una superficie complessiva di 5000 m², creiamo prodotti sempre all'avanguardia e al passo con le più moderne tendenze del mondo del design per arredamento di interni a partire da materie prime di qualità eccellente.

ALLUMINIO ANODIZZATO / ANODIZED ALUMINIUM

Le accattivanti finiture anodizzate derivano da materie prime e lavorazioni eccellenti che ne garantiscono la qualità e durata nel tempo.

Sono ideali per gli ambienti contemporanei dalle linee essenziali poiché si integrano perfettamente con i materiali innovativi e moderni nonché agli elettrodomestici.

The appealing anodized finishing come from excellent raw materials and processing which guarantee their quality and duration in time.

They are ideal for contemporary and essential contexts because they match innovative and modern materials perfectly as well as electrical appliances.

ALLUMINIO PRE-VERNICIATO / PRE-PAINTED ALUMINIUM

La gamma dei toni pre-verniciati spazia dai colori più neutri come il bianco e il nero, che si prestano ad abbinamenti azzardati con superfici vivaci, fino alle calde sfumature del legno per chi preferisce soluzioni di design più "rétro" e tradizionale.

The pre-painted nuances range from the more neutral colours like black and white, suitable for blending in with lively and colourful surfaces, to the warm wood tones preferred by lovers of more "rétro" and traditional solutions.

ALLUMINIO MICROFORATO

MICROPERFORATED ALUMINIUM

Questa originale lavorazione di micro-foratura eseguita sui precedenti materiali apporta notevoli e funzionali vantaggi.

Favorisce il riciclo di aria per disperdere ad esempio il calore generato dall'utilizzo di elettrodomestici e gli odori o ancora consentire il passaggio di luce e di raggi infrarossi per controllare dispositivi elettronici mediante radiocomando.

This original micro-perforation of the above-mentioned materials brings remarkable and functional advantages.

It eases air-circulation to diffuse heat caused by using appliances and smells, or again allows the passage of light and infrared rays to control electronic devices by remote.
